Notes on Academic Data and Methodology:

1. For more information on the Performance Framework and the indicators, measures, metrics and targets used to evaluate charter schools in New Jersey, click here: <http://www.nj.gov/education/chartsch/PerformanceFramework.pdf>
2. This year's report will include the following measures within the Framework:
 - i. 1A: Proficiency Status - % Proficient & Advanced (LAL/Math)
 - ii. 1B: Advanced Proficiency (LAL/Math)
 - iii. 2A: District Comparison - % Proficient & Advanced vs. District Average (LAL/Math)
 - iv. 2C/D: Peer School Rank – Academic Achievement (Combined for LAL/Math)
 - v. 3A: Student Growth – Median SGP (LAL/Math), if applicable
 - vi. 4B: Graduation Rate – 4-Year Adjusted Cohort Graduation Rate, if applicable
3. In the top section, Grade Levels and Enrollment are for the 2013-2014 School Year. Enrollment is based on the October 15, 2013 count.
4. Demographic information for FRPL, LEP, and racial demographics are provided for the 2012-2013 school year (due to 2012-13 test score data) and were taken from the 2012-2013 Fall Survey file (produced through NJSMART) found here: http://www.state.nj.us/education/data/enr/enr13/stat_doc.htm
5. Special Education school percentages are taken from page 2 of each school's performance report: <http://education.state.nj.us/pr/>
6. The assessment data below includes all students with test results at the school and may differ from the School Performance Reports. The School Performance Reports do not count test results for students marked "Time in School less than one year" in NJSMART.
7. Due to differences in state assessment data in grades 3 to 8 and high school, the Academic Framework separates schools into two categories: Elementary School/Middle School and High School. Schools that have NJASK data in grades 3 to 8 will be evaluated using different metrics than schools that serve students in grades 9 through 12. If a school includes both of these grade spans, the school's grade spans will be evaluated separately. For example, if a school serves students in grades

6 through 12, grades 6 to 8 will be evaluated separately from grades 9 through 12. The NJDOE will produce two school cards for this school in this report.

8. **District Comparison:** A charter school will be evaluated against the single district that is sending the highest percentage of students to the charter school. For example, if a charter school is located in City A but most of the students attending this school are coming from City B, the charter school's performance will be compared to City B. If a charter school is receiving students from multiple districts, the charter school will be compared to the district that is sending the highest percentage of students to the charter school.

9. **Peer School Rank:** Charter schools may be evaluated against both charter and traditional public schools and may be evaluated against schools from across the state of New Jersey. The complete methodology used by the NJDOE to create the peer schools can be found here: <http://education.state.nj.us/pr/PeerMethodologyWhitePaper.pdf>. The Performance Framework will evaluate how charter schools rank in the "Academic Achievement" category under Peer Rank (Percentile) within the school performance report.
